Does your child stand out around other children? Do they behave in ways that don't make sense? Do you have questions about autism?

SCHOOL AUTISM SCREENING PROGRAM

Early identification of delays opens the door to early intervention for children with autism or developmental issues. Understanding Archer, LLC is bringing an optional screening program to your child's school. If you have concerns that your child may have autism, this screening program can provide insight on the potential for a diagnosis and provide guidance on next steps.
